

Date: 10 March 2018

Felixstowe-Shotley-Harwich high voltage electricity improvement scheme – River Stour Directional Drill at Whinny Queech, Shotley

Dear Resident,

We are writing to advise you that we will be returning to Whinny's Queech, off Stourside, on 19th March to finalise our directional drilling works.

Most of the work will take place on the Harwich side of the river, however there will be a requirement to operate the drill intermittently for a 2-3 day period within Whinny's Queech during the first phase of our programme.

The equipment we use means that some disturbance is unavoidable, but we will make every effort to minimise any unnecessary noise and our works will be limited from 7am to 7pm Monday to Sunday.

We will also have staff from our contractors McNicholas on site at other times.

If you have any queries or questions prior to this, please do not hesitate to contact our contractor's careline on 0845 2000214.

Yours sincerely,

Duane Gay
Project Manager
UK Power Networks
